

Cloud Computing Services

Total points 2

1.Question 1

Does a cloud computing service let you scale your resource use up and down?**1 point**

Yes **Correct**

That is correct. The cloud provider has a pool of resources and lets you use more or less on demand.

No

2.Question 2

To get resources from a cloud computing provider, is working with a person at the provider required?**1 point**

Yes

No**Correct**

That is correct. Cloud computing resources are available on-demand and self-service. (An exception: cloud computing providers typically set some limits on the amount of resources a customer can consume by default, to help customers avoid accidental runaway resource usage and charges. These limits can be raised by the cloud provider.)
