GCP Regions and Zones

Total points 2

1.

Question 1

Why might a GCP customer use resources in several zones within a region?**1 / 1 point**

For improved fault tolerance

For better performance

Correct

Correct. As part of building a fault-tolerant application, you can spread your resources across multiple zones in a region.

2.

Question 2

Why might a GCP customer use resources in several regions around the world?**1 / 1 point**

To bring their applications closer to users around the world, and for improved fault tolerance

To improve security

Correct

That is correct.
